

Keybox

Smart solutions for simpler needs

The Keybox series range from a key cabinet on code to a system with full registration per key. Flexible systems save money: start with storage for a few keys or compartments and then expand in step with the growing need.

Basic and System can be expanded by up to 96 compartments connected to a main cabinet. The Keycontrol series controls up to 924 key positions in one cabinet.

The three series

Basic

Keypad for codes, 500 codes per cabinet, 18, 32 or 216 key hooks or 6 small compartments.

System

Display with menu, up to 500 users and 3,600 events, optionally administered via KeyWin Light.

Keycontrol

Registration per key via IntelliPin, up to 924 key slots, managed with KeyWin6.

Flexible systems save money

Start with storage for a few keys or compartments and then expand in step with the growing need. All key cabinets can be expanded using Expansion cabinets, by up to 15 cabinets in any combination. This means there can be 96 compartments in just one key management system, all controlled via just the one keypad.

9001 B — one door, 32 key hooks

9006 B — six compartments

9500 B — 216 key hooks

The Basic series is based on simplicity and security. The key cabinets are equipped with a keypad for entering codes and programming. The key cabinet has a small green diode above the keypad that indicates that the cabinet is active and blinks faster when it is in service mode. The key cabinets are available in various models with 18, 32 or 216 key hooks or, alternatively, with 6 small compartments. All key cabinets can be expanded using Expansion cabinets, by up to 15 cabinets in any combination. This means that there can be 96 compartments in just one key management system, which are all controlled via just the one keypad.

Models

MODEL	VERSION	EXTERNAL DIMENSIONS	WEIGHT
9001 B	1 door, 32 key hooks	350 × 280 × 85 mm	5,3 kg
9002 B	2 doors, 18 key hooks (9 in each door)	350 × 280 × 85 mm	5,3 kg
9006 B	6 small compartments · internal 145 × 40 × 60 mm	350 × 280 × 85 mm	5,3 kg
9006 B Stainless	6 small compartments, stainless steel	350 × 280 × 85 mm	6,0 kg
9500 B	1 door, 216 key hooks	746 × 730 × 140 mm	28 kg

Facts and functions

Keypad for entering codes and programming.

500 unique codes per cabinet.

Expandable by up to 15 cabinets from the Expansion series.

Simple connection (230V).

Steel, 1.5 mm · powder coating.

Accessories (B)

Battery backup.

Facade installation kit.

9001 S — one door, 32 key hooks

9006 S — six compartments

9500 S — 216 key hooks

System is a series of key cabinets that are a bit more intelligent and flexible, where the keypad comes with a display to provide a good overview and easy programming. The cabinets can handle up to 500 users (codes with 1-8 characters) and store up to 3,600 events. System can be administered via KeyWin Light. The cabinets are available in various models with 18, 32 or 216 key hooks or, alternatively, with 6 small compartments.

Models

MODEL	VERSION	EXTERNAL DIMENSIONS	WEIGHT
9001 S	1 door, 32 key hooks	350 × 280 × 85 mm	5,3 kg
9002 S	2 doors, 18 key hooks (9 in each door)	350 × 280 × 85 mm	5,3 kg
9006 S	6 small compartments · internal 145 × 40 × 60 mm	350 × 280 × 85 mm	5,3 kg
9006 S Stainless	6 small compartments, stainless steel	350 × 280 × 85 mm	6,0 kg
9500 S	1 door, 216 key hooks	746 × 730 × 140 mm	28 kg

The System series is also available in stainless steel and in a black finish. All cabinets can be expanded using the Expansion series, by up to 15 cabinets.

Facts and functions

Display with simple menu and programming.

Handles up to 500 users (codes with 1-8 characters) and stores up to 3,600 events.

Settings for validity period per code.

Setting for the number of times a code is valid.

One code to one or more compartments.

Memory for codes and log.

Date and time in display · time zones · double code · block function.

Event log in display · clear service menu.

Expandable by up to 15 cabinets from the Expansion series.

Can be administered using the KeyWin Light PC program.

Can be connected to external alarm and external card reader.

Choice of language · simple connection (230V) · steel 1.5 mm · powder coating.

Accessories (S)

Battery backup.

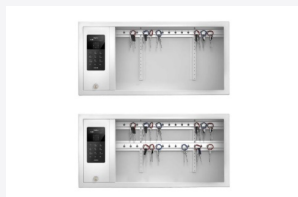

Alarm contacts.

KeyWin Light.

Facade installation kit.

Cabinet opened, with key strips

14 key slots on each strip

KR security cabinets

Your Keycontrol system can include everything from a few up to several thousand keys. You can easily add strips and key space to your key cabinet, or expand the key management system with more cabinets, to meet your growing needs. Pair the IntelliPin and key together, then place them on the strip on the wall or in a cabinet. Each IntelliPin carries a unique ID, which means you can easily identify the status of individual keys directly from the web application KeyWin6. The key cabinets have a display with a simple menu and search function. The cabinets are also equipped with battery backup, alarm and 14 key slots on each strip. Choose either locked or unlocked key slots, and on the large models between a sheet metal or glass door. SSF3492 security rating.

Models — control up to 924 key positions in one cabinet

MODEL	KEY SLOTS	SIZE (H × W × D)	WEIGHT
9400 SC	maximum 42, 3 strips	370 × 746 × 140 mm	25 kg
9500 SC / 9500 EC	maximum 84, 6 strips	730 × 746 × 140 mm	30 kg
9550 SC / 9550 EC	maximum 210, 15 strips	1460 × 746 × 140 mm	70 kg
9600 SC	maximum 224, 16 strips	1470 × 380 × 698 mm	130 kg
9700 SC	maximum 924, 66 strips	1720 × 980 × 690 mm	280 kg

IntelliPin

Fourteen key slots on each strip. Each IntelliPin carries a unique ID, which means you can easily identify the status of individual keys directly from KeyWin6. Pair the IntelliPin and key together, then place them on the strip on the wall or in a cabinet.

KeyWin Light — for the System series

The KeyWin Light PC program gives a better overview of the System series. You can check and control the system by plugging a USB flash drive with a service code into the cabinet. The event log is also downloaded to the USB flash drive, which you can then process on a computer.

KeyWin6 — for the Keycontrol series

KeyWin6 is the latest version of the market's most comprehensive administrative tool for securely managing keys and valuables. One or more administrators can manage key cabinets and keys with the highest possible precision, from anywhere in the world. Choose between the KeyWin6 IoT cloud service based on IoT technology through Microsoft Azure or an on-premises software installation.

What KeyWin6 manages

Users

Selected or random PIN code · login via PIN code or card reader · option to change code at the cabinet · deactivation of users · validity period · individual language settings · restrict number of key removals · user type (dual level authentication) · advanced search function.

Event log

Log from PC and cabinet · select what a log displays · intelligent search function · sort by date or events · clear alarm indications · reports as PDF document · alarm forwarded to e-mail.

Key cabinets

Display screen with search function · information about who has a key · service menu for configuration · administration code with full authorisation · automatic or static IP address · top 10 most frequent users and most frequently used keys · statistics on keys removed and on the total number of keys and groups in the system.

Keys

Time limit · searchable hidden key ID · colour coding of keys · graphic overview of keys · a key in one or multiple cabinets · free or fixed key position.

Settings

Cabinet overview · administration overview · import users via XML · export users or keys to PDF · number of characters for codes · add or remove card reader · product information · e-mail settings for alarm incidents · choice of language · door, key and burglar alarm · smart mode · connection for external reader and external alarm.

Groups, administrators, booking and reports

Groups for users, keys and compartments · time channels · edit administrator permissions · selection of cabinet for administration · activities registered in log · booking a specific key · daily statistics on alarms and key removals.
