

SWATBox™

Embedded storage in your wall, away from public view

KEYS

CAVITY FOR ASSET STORAGE

SMARTFOBS

The SWATBox® features an embedded install which conceals physical assets within your facility wall and away from public view. Use PIN, ID device or any web enabled device (e.g., laptop, smart phone) to gain access to assets on the spot. The customizable interior cavity may hold cards and keys or act simply as a locked drawer. Our solar powered model allows you to secure and monitor assets in remote or unmanned locations.

Inside the unit

Cavity for Asset Storage

The customizable interior cavity may hold cards and keys, or act simply as a locked drawer.

Keys

Direct entrapment of important or master keys, compatible with Tamper-Proof Key Rings®.

SmartFobs

Keys on a SmartFob are secured and identified per position.

SUPPLY THROUGHOUT EUROPE, INSTALLATION IN THE NETHERLANDS AND BELGIUM

Direct Control SWATBox™

The SWATBox is also available in "Direct Control" versions. These are units from which the embedded systems that power our standard devices are omitted. This option can appeal to those who seek direct control over every position and door of a device without intermediary computing hardware and/or software. Direct Control SAM is ready for access control, featuring clearly marked pass-through row boards with screw terminals for easy connection to an existing control system. In addition, Direct Control SAM can include almost all options* found in the standard SAM line, such as a variety of lock types, direct entrapment of important or master keys, compatibility with Tamper-Proof Key Rings®, and more.

This Direct Control SWATBox is housed in our same high strength shell but operates solely on an external signal from your existing access control system. Provide your own 12 volt pulse to open the SWATBox on command.

SWATBox With ID Device

Integrate your existing ID device with our SWATBox. Your employee's current IDs are all that are needed for one step access.

Direct Control

No embedded electronics: opens on a 12 volt pulse from your access control system.

With ID device

Your existing ID card gives access in one step.

* Not all options from the standard line are available in every Direct Control version; we confirm this per request. Subject to change.
